

2015 PCSP Annual Session

80 Years of Elevating Prosthodontics

Deer Valley, Utah

June 24-27, 2015

Wednesday, June 24, 2015

Empire Session: “Achieving Longevity with Dental Restorations”

For eighty years The Pacific Coast Society for Prosthodontics has provided a platform for great speakers from around the world to present scientifically driven papers demonstrating new techniques, materials, and ideas to help provide our patients with long-lasting restorations, and elevate the practice of prosthodontics. In this session our speakers will sort out the myths and provide evidence to support the reality of new trends in prosthodontics.

8:00-8:15 Opening Remarks and President’s Welcome address. **Dr. Jacinthe Paquette and Dr. Gary Solnit** introduce the program theme.

Moderator: Dr. Mark Exler

8:15-9:15 **Dr. Irena Sailer** - “Metals, Ceramics, Composites, and Hybrids: Clinical Criteria for the Choice of Materials”

9:15-9:45 **Dr. Ariel Raigrodski**- “Design Considerations for All Ceramic Restorations for Mitigating Complications”

9:45-10:15 **Dr. Gary DeWood**- “Space, The Laboratory Dilemma”

10:15-11:00 Break

Moderator: Dr. Jean Wu

11:00-11:30 **Dr. Will Martin**- “Implant Dentistry for the 21st Century: Restorative Realities with Techniques, Materials, and Outcomes”

11:30-12:00 **Dr. Dean Morton**- “Contemporary Prosthodontics in a World of Evolving Protocols and Materials”

12:00-12:30 **Dr. Thomas Taylor**- “ Ceramic Failure in Implant Prosthodontics-What Gives?””

12:30-12:45 **Panel Discussion. Achieving Longevity with Dental Restorations, Questions and Answers**

12:45-1:30 **Graduate Student Essay Competition**

Thursday, June 25, 2015

Flagstaff Session: “Surgical Techniques to Enhance Prosthetic Stability”

It has become increasingly more important for prosthodontists to elevate their knowledge of the surgical procedures that allow for longer lasting restorations. Whether this knowledge is to elevate their own surgical expertise or just have more knowledge of their surgeon's limitations and guidelines, restorative dentists must be able to sift through the vast introduction of new grafting materials and techniques. They need to take a more active role in the pretreatment surgical decisions that might make the difference between a long-lasting restoration, or one that is doomed to fail. In this session our speakers will present evidence-based material that will provide prosthodontists with basis for these decisions.

Moderator: Dr. Mark George

8:00-9:00 **Dr. HP Weber-** “Using New Technologies to Enhance Implant Treatment Outcomes”

9:00-9:40 **Dr. Sonia Leziy-** “ Impediments to Success and Avoidable Complications that Begin in the Surgical Phase of Implant Treatment”

9:40-10:10 **Dr. Paul Fugazzotto-** “Defining Success in Periodontal, Regenerative Therapies”

10:10-10:30 **Dr. Matthew Kahn-** (Assoc. Speaker) “Pathologic loss of tooth structure”

10:30-11:15 **Break**

Moderator: Dr. Gerard Charanduk

11:15-11:45 **Dr. Dennis Shanelec-** “Immediate Implant Placement and Provisionalization: 12 Year Analysis of 460 Cases in the Esthetic Zone”

11:45-12:15 **Dr. Russell Nishimura-** “Prosthetics to Facilitate and Enhance Surgical Outcomes”

12:15-12:45 **Dr. Larry Brecht**

12:45-1:05 **Dr. David Carsten-** “Dental Anesthesiology: Oral Regimens vs. Intravenous”

1:05-1:30 **Panel Discussion, Surgical Techniques for Longevity with Restorations, Questions and Answer**

Friday, June 26, 2015

Silver Lake Session: “Managing new Technology in Private Practice: Does it All Really Improve Prosthetic Stability?”

Prosthodontists are constantly inundated with new products and techniques being pushed upon them before careful research is done to support them. Manufacturers promise more efficient and cost effective techniques without the evidence to show that restorations will actually last longer or look better with time. The digital age has also opened up an entire theatre for these claims, with tracking software, computer guided milling, and diagnostic imaging that can either make our practices more efficient or just become another headache and expense. In this session our speakers will address these issues and help to sort out the myth from the reality.

Moderator: Dr. Brian Kucey

8:00-8:50 Dr. Daniel Edelhoff- “Innovative Approaches in the Rehabilitation of Complex Cases”

8:50-9:20 Dr. Jeff Ganeles- “Shorter, Narrower, Fewer, Faster, and Tilted”

9:20-10:00 Dr. Gerald Niznick- “Historical Perspective on Implant Design”

10:00-10:20 Dr. Saj Jivraj (Assoc speaker) “CAD/CAM Design in Full Arch Prostheses”

10:20-10:30 Gulick Award

10:30-11:15 Break

Moderator: Dr. Chris Travis

11:15-11:45 Dr. Dr. Lee Brady- “Assessing and Managing High Risk Caries Patients”

11:45-12:05 Dr. Kumar Shaw (Assoc speaker) “Novel New Implant Attachment”

12:05-12:25 Dr. Vahik Paul (Assoc. speaker)

12:25-12:55 Dr. Jim Metz- “Breathe, Your Life Depends Upon it!”

12:55-1:40 Keynote Closing Speaker TBA, spouses etc.

1:40-1:45 Closing Remarks Dr. Gary Solnit

1:45-1:50 2016 Annual Meeting Preview
